-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Applicant's election with traverse of Group I, claims 1-18 in the reply filed on 13 April 2004 is acknowledged. The traversal is on the ground(s) that there is no undue burden on the office. This is not found persuasive because the US classification system provides different searches for both magnetic processes vs. apparatus and flotation processes vs. apparatus. Clearly a combined search would be more burdensome.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wheelock (US 3850811). Wheelock '811 discloses a process for separating of suspended magnetics from a liquid carrying the magnetics. He employs a grid structure designated by 11 (strips) which capture magnetics as they traverse the grid while allowing the liquid to pass. It is axiomatic to everyone including one of ordinary skill that non-

magnetics would pass the magnet if present. To provide both entities present to capture the magnetics only would have been within the ordinary skill in the art.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wheelock (US 3850811) as applied to claim1 above, and further in view of EP 510849. To provide the grid as an orthogonally oriented grid as set forth in claim 2 would have been obvious in view of EP '849 which teaches such a feature as shown in figure 6 for example. Such orientation allows easier backwashing for removal of accumulated solids.

Allowable Subject Matter

5. Claims 3, 5-6 and 8-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
